Some Common Faults
of Telephone Service and
How to Avoid Them

You probably never realized how many of the common faults of telephone service, as you come in contact with it, are due simply to *careless use* of the service by the public. Let us give you a few examples to illustrate this:

A number is guessed at, the wrong bell is rung, an innocent subscriber is disturbed, a voice says, "They gave me the wrong number"—and the Company gets the blame.

A bell rings,—it rings again—still no answer. The Operator finally reports, "They don't answer," (note she never says "they are not there") and the connection is taken down. Five seconds later—just **six seconds too late**—the ring is answered and the tardy subscriber gets **"Number"** from an Operator who knows nothing about the call in question as **she had nothing to do with it.** Upon being told "Why! you just rang my bell!" she can only say what we instruct her to say; "Excuse it, please. There is no one on your line now." She apparently acknowledges the error and again the Company is blamed; especially, when, a little later the called party meets the calling party and says she was "right there all the time."

A person steps in and "borrows" the use of a telephone. When through talking he leaves the telephone **off the hook,** thus keeping the line "busy" and causing a series of busy reports to be made to calling parties. Finally, a clerk, or servant, finds the receiver off and replaces it. Business is resumed and the friend, who has been "trying for fifteen minutes" to get the line blames the Company severely when he is told, **truthfully,** that "I have been right here all the time and the line hasn't been in use for twenty minutes."

The same thing results when the called for subscriber forgets, or overlooks, the fact that he is **sharing a party line** with someone else, and that therefore the line might easily have been "busy" all the time and he not know anything about it.

Now we have no desire to dodge our full responsibility for giving good service. We are not only willing but *very anxious* to learn all the real troubles of which you have to complain—even those for which we are not directly responsible.

We want this help from you-- in the form of accurate detail complaints—and we will help you cure those for which other subscribers are responsible; by printing these pages in our directory; by explaining in any way we can the operation of our system and the reasons for our rules and regulations; also by calling attention to the following *simple rules,* which, *if followed by all* will make it easy for us to give, and for you to get, Good Service—which is *what we are here for.*

REMEMBER THIS

No community ever enjoyed really first class telephone service unless the Telephone Company had the intelligent and hearty co-operation of its

SUBSCRIBERS AND THE PUBLIC

Rules for Good Service

1. Use the Directory. Never *try* to remember a telephone number. It's all right *if you do remember* it; but to *try* to remember is to begin to *guess.* If you have the least doubt about it, *look it up* and thus save time and trouble.

(As a matter of fact, you know, you have no more right to disturb a subscriber by guessing that his number is the one you want than you have to disturb him in any other entirely needless way.)

2. Spell Out all Numbers, by giving each figure separately, as "Main *one, three, seven, nine,*" for "Main 1379."

(The following of this rule is essential to good service. A majority of errors in calls is directly traceable to confusion between "eighteen" and "thirteen," "twenty-three" and "thirty-three," etc., which sound so much alike over the telephone; also to the fact that subscribers do not correct the Operator if she repeats the wrong number.)

3. Speak Distinctly, especially when giving the number to the operator, and when talking over a toll line. *Talk into the mouth-piece,* loud and close enough so they can *hear you easily.*

4. Answer Your Bell Promptly. A ring means a friend calling you—don't make him wait, or perhaps miss you entirely.

5. Call Central by giving the crank *two or three quick turns.* Don't ring too long. *Always ring off* when through talking.

6. Until Your Bell Stops Ringing do not remove the telephone from the hook.

7. Be Brief but Courteous to the Operators. We require them to be so to you. They have *no time to converse* with you; they *do not know* subscribers' names; they deal *entirely with numbers.*

Courtesy, like virtue, is its own reward, but pays *extra dividends* in connection with telephone service. *Try it.*

P. S.—By the way, when you know that a false call is due entirely to your careless use of the wrong number why not acknowledge it to the "innocent by-stander" who answers the call? Why leave the Operator to shoulder all the blame?

8. Call for "Information" when you can't find the telephone number you want, or to get answers to any questions regarding subscribers' names, numbers or addresses. Your regular Operator cannot answer such questions.

9. Report all complaints promptly to Chief Operator

To be most effective they should be not only prompt but shou *describe accurately* the trouble encountered. Many forms of troub look alike at first, and most of them we will not know about ti you tell us. If you can't get Central at all, call up from a neighbo or send us a postal card.

10. Advertise That You Have a Telephone, but *don't* put its "number" on your letter heads, bill heads, cards and *wagons. Why?* Because this only increases the amount of *trying to remember* such numbers by the public—also the continued use of obsolete numbers—which in turn *only hurts the service* and doesn't help your business at all. *Think this over.*

11. Be Reasonable. You always are—yes, of course—but what we mean is this. It is unfortunate—for us—that a telephone subscriber sees nothing, when getting service, but *himself and one telephone instrument.* He doesn't see the other hundreds or thousands of subscribers and he gets no idea of the work we are really doing and the violent and uncertain changes in the number of calls given us at various hours of the day.

We Have Rushes of Business just as the street cars, the stores and the Post Offices do. Yet a man who will *patiently* wait in line *two or three minutes* to be allowed to deposit his money in someone's Bank will become *"disgusted with such service"* if he has to wait in line *fifteen seconds* to get an Operator to connect him with his residence that he may inform them he "will be a little late to dinner."

It's a fact. And we think the reason is indicated above. It's human nature, perhaps; but human nature can be improved if one tries, and all we ask is that you try. Ask yourself these questions:

"Does any other company or store in town wait on me so uniformly promptly, or cause me so little direct loss of time, as does the Telephone Company?

"Can I get the services of a street car, a clerk, a sales girl, a cashier, or of any one else nearly as quickly, whenever I want them, as I can those of a Telephone Operator?"

So We Repeat—*be reasonable* in your complaints, and patient withal, if the operator is *occasionally* too busy, waiting on our other customers, to give you *instant* attention. Meanwhile we will undertake to make your average service prompt and the longer delays reasonably few and far between. When you are not satisfied with it, don't discuss the matter with the Operator, but let our Manager know about it.

12. Observe these Rules if you believe they are good ones. If not, call on our Manager, see our plant in operation, and give him an opportunity to convince you. For we must all work together if we are to have

GOOD SERVICE

Some Advantages of Rural Telephone Service

1. **In case of fire** the neighbors can be quickly aroused by telephone and their assistance secured.
2. **In sudden illness** the doctor can be called and information obtained as to what can be done temporarily, to alleviate pain or even prolong life, until he arrives.
3. **If the cows get in the corn,** or the pigs in the clover, or a horse gets cast—with only the women at home—the telephone will usually bring a willing neighbor to prevent loss of property.
4. **When tramps come to the door,** while the men folks are all out in the fields. the presence of the telephone will give the women courage, protect them from harm, and summon help.
5. **When products are for sale,** if the farmer is expecting prices to rise or fall, he can call the nearest market town, and can sell or buy to the best advantage at the right moment without uncertainty or loss of his time.
6. **The telephone pays for itself** by just such economy of time, energy, horse flesh, and wear and tear on harness and wagons, while the neighborly feeling and protection it gives your household is itself worth its entire cost.
7. **If the farmer is in town** and should unexpectedly be detained, how convenient to ring up his house and tell the anxious wife the cause of his delay; also to learn how things are at home.
8. **During the long winter evenings,** when it is difficult to go out and see the neighbors, the telephone will keep them informed of all that is going on and will help greatly to make the time pass pleasantly. By annihilating distances the telephone destroys the loneliness of country life.
9. **Parents can call their sons and daughters** who have moved to adjoining towns in case of sickness at home, or their sons and daughters can call them and let them know of their successes, or perhaps that there is sickness and the need of the mother's loving care.
10. **What a comfort and a saving of time** to be able to go to the telephone and call up your friend, ask the questions, deliver the messages or place the orders, instead of stopping work for the best part of the afternoon—taking off a horse that ought to be earning money—and driving miles, perhaps, over muddy, frozen or snow-bound roads.
11. **When getting a telephone, get the best**—the one that reaches everywhere—the Old Reliable—the one furnished by the

CENTRAL UNION TELEPHONE COMPANY

How to Make a Long Distance or Toll Call

Call Central by giving the crank two or three sharp turns.

When the Operator Answers by saying "Number," ask her for "Long Distance."

When the "Long Distance" Operator Answers, give her your own telephone number, your name and the telephone number—or the name and address—of the person with whom you wish to be connected, as follows; speaking *slowly and distinctly:*

"This is Main, one, two, three; Mr. 'A.' talking.

"I wish to talk with any one at Main, seven, eight, nine, Indianapolis, Ind.; (or,)

"I wish to speak to Mr. 'B.' of the firm of 'B. & C.' at Indianapolis, Ind. If he is not there, I will talk with Mr. 'C.'" (or) "if he is not there, please leave word and call me when he comes in."

Remain Near the Telephone after having placed a Long Distance call. If you have to go out before the call is completed leave word *just when* you expect to return.

Don't Lose Your Incoming Calls, and the *business they represent,* by allowing your office boy or clerks to fail to notify you of them. You might as well allow them to throw away your incoming mail *unopened.* Therefore, if "Long Distance" requests that you call as soon as you return, *please do so.*

Appointments to Talk at a Specified Time will be made without additional charge, other than for the actual messenger services involved, if any. This feature of our service will often be found of great convenience.

If your Correspondent has no Telephone, and if you so desire, a Messenger will be sent to ask him to go to the nearest Public Pay Station. The expense for such *Messenger Service* will be charged to your telephone, but may be collected at the distant end instead, *if acceptable to the called party.*

Charges on "Long Distance" or Toll Calls can likewise be collected at the distant end *if the called party agrees* to such an arrangement. If you desire a call to be sent "collect," you should so state *at the time* you first give the call to "Long Distance."

A Telephone is not an Expense

It is a modern invention which does what it claims to do—

It Saves more than it costs

Everyone who tries it finds this out.

RULES for GOOD SERVICE

Do You Know How to Use a Telephone?

There is only one right way for a person to answer a call on a telephone, and that is by announcing his name, his firm's name, or his telephone number.

WHICH METHOD DO YOU USE?

1.

THE WRONG WAY.

Bell Rings.

"Hello"
"Is this Main 1576"?
"Yes"
"Mr. Brown"
"Yes"
Conversation begins.

1.

THE RIGHT WAY.

Bell Rings.

"This is Mr. Brown".

Conversation begins.

2.

Bell Rings.

"Hello"
"Hello, is this Main 1576"?
"Yes"
"Smith and Jones"
"Yes"
"Give me Mr. Jones"
"Hello"
"Hello, Mr. Jones"?
"Yes"

Conversation begins.

2.

Bell Rings.

"This is Smith & Jones".
"Call Mr. Jones, please".
"This is Mr. Jones".

Conversation begins.

What Telephone Users Can Do to Help the Service

THERE ARE ALWAYS THREE parties to a telephone call—the person calling, the telephone operator and the person called. * * * All are human All must cooperate. * * * Courtesy will help all.

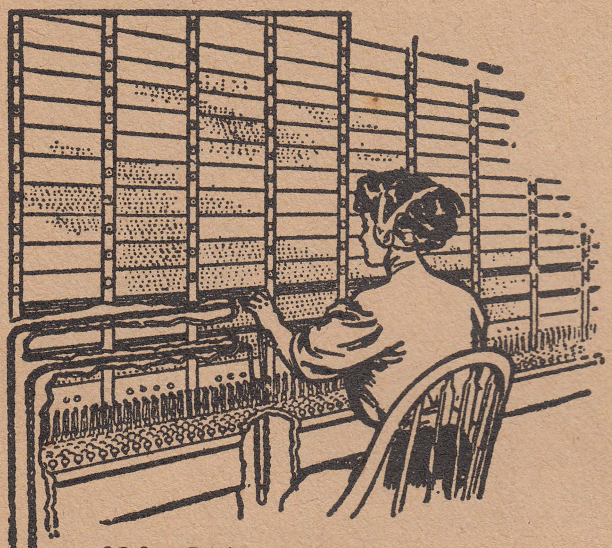

WE ENFORCE OUR OPERATING RULES with our employes to insure Courtesy, Expertness and Speed on their part.

YOU MUST ENFORCE RULES—written by experience and reproduced below—to enable you to receive **First Class Service.** There is no other way. The Company **alone** cannot insure good service.

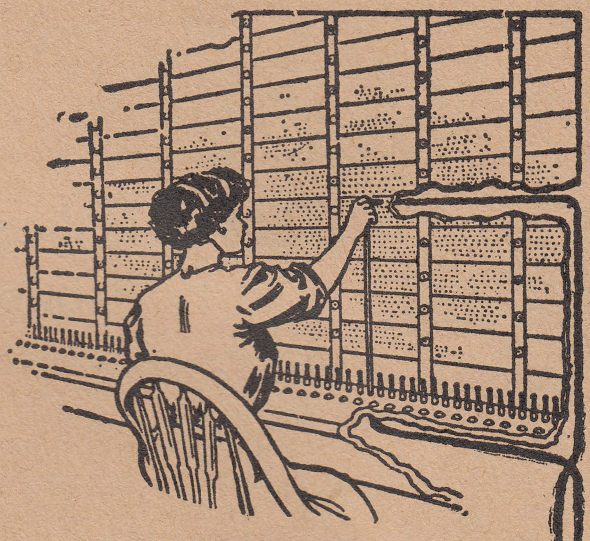

1. **USE THE DIRECTORY**—Don't try to remember numbers. Don't guess. Look it up.
2. **SPELL OUT ALL NUMBERS,** one figure at a time. For Main 1375, say "**Main-one-three-seven-five.**"
3. **SPEAK DISTINCTLY,** especially to the Operator. Talk **into** the transmitter—not simply at it.
4. **ANSWER YOUR BELL PROMPTLY.** Don't make your friends wait unnecessarily. Don't hold your line uselessly "Busy."
5. **MOVE THE HOOK VERY SLOWLY** up and down when you want to recall the Operator. A quick motion is useless.
6. **WHILE THE BELL IS RINGING** do not remove the receiver from the hook; it may interfere with the signals.
7. **BE BRIEF BUT COURTEOUS** to the Operators. They have no time to converse. They do not know subscriber's names.
8. **CALL FOR "INFORMATION"** for names or numbers not listed in your book or for special information regarding subscribers.
9. **CALL FOR "CHIEF OPERATOR"** to report all complaints, and please do so promptly, taking pains to give exact information as to **What, When and Where.**
10. **HELP US TO STOP THE USE OF OBSOLETE AND WRONG NUMBERS,** by making the current issue of our Telephone Directory **the one source of information.**

Telephone Operating

EFFICIENT TELEPHONE SERVICE is critically dependent upon good telephone operating. A telephone plant may be properly designed to meet every traffic requirement. It may be well constructed and maintained. But unless it is operated by a competent force, well organized and well trained, the service will be slow and inefficient.

EFFICIENT TELEPHONE OPERATING requires systematic instruction and thorough preliminary training of the operating force. A telephone operator properly taught is more efficient than one who learns by observing the work of others. Recognition of this fact led to the adoption of standard rules and a regular course of study in them.

OPERATORS must be girls of natural intelligence, who can speak distinctly and write clearly. They must have good health, good eyesight, good hearing and a fair education. Not all of the applicants for positions are accepted, but those who pass are at once put on the pay roll.

SECONDS MARK TIME IN TELEPHONE OPERATING. The public desires the most efficient telephone service that can be rendered. That it receives such a service from the Bell Company is indicated by the following representative statistics showing the average time elements of the local traffic, as shown by recent tests:

Average time required for operator to answer a call from a calling subscriber	3.4 seconds
Average time required for operator to connect with and start ringing called subscriber	11.5 seconds
Average time required for subscribers to answer the telephone	12.4 seconds
Average time required to disconnect lines after conversation is completed	3.6 seconds

THE TELEPHONE OPERATOR'S WORK is complex and she must be prepared for every contingency that may arise. She must know the proper routing for any call that may be made, and must start each call along the proper channel without an instant's hesitation.

ANSWERING CALL

Helpful Suggestions

AND

Information for Bell Telephone Patrons

Long Distance Service

TO MAKE A LONG DISTANCE CALL—Call the Local Operator in the regular way and ask for "Long Distance" When the Long Distance Operator answers, give her the number of the telephone desired (if known), the city or town and the state. If a particular person is desired, give his name. Then give the telephone number from which the call is made and the name of the person making the call. If the number of the telephone desired is not known, give the firm name or the name and initials of the person under whose name the telephone is listed and, if possible, the street address.

MESSENGER CALLS.—If the person desired is not connected by telephone, a messenger will be sent to his address to request him to come to a telephone, provided the party calling guarantees payment for the messenger service. The exact amount disbursed for messenger service will be charged in addition to the Company's tariff rates.

APPOINTMENT CALLS.—Appointment to talk at a specified time may be made by notifying the Long Distance Operator of the time at which the connection is desired. No extra charge will be made for appointment calls (except for Messenger Service when such service is involved), but the Company cannot guarantee the completion of the connection at the exact time specified.

COLLECT CALLS.—The charges on a Long Distance call, including Messenger charges, if any, may be made against the telephone called, provided the charges are accepted by the party called. Requests to have the charges collected from the telephone called should be made when the call is given to the Long Distance Operator

LEAVE WORD CALLS.—If the person with whom you wish to talk is not immediately reached at the telephone called, word may be left (without charge) to have him call when ready to talk.

REPORTS.—In case delay is encountered in completing a call, the Long Distance Operator will advise the person calling, at reasonable intervals, regarding the cause of the delay If a report is desired, call the Long Distance Operator and ask her for the information desired.

RATES AND CHARGES.—Rates for Long Distance service are based upon an initial period of 3 minutes; and the three-minute rate will be charged for connections not exceeding three minutes. For overtime, beyond the initial period of three minutes, charge will be made by the minute for each additional minute or fractional part thereof. The Long Distance Operator will not interrupt conversation to notify subscribers of the expiration of the first three minutes.

When a particular person is asked for, every reasonable effort will be made to establish the connection with the person desired If the person desired is not reached, no charge will be made for the service rendered, except for Messenger Service, should such service be involved.

When no particular person is asked for at the time the call is given to the Long Distance Operator, charge will be made if connection with the proper telephone is established.

REQUESTS FOR CHARGES.—If a patron desires notification of the amount of the charge on his message, he will save time by so advising the Operator at the time he gives his call. If the request for such information is not made until the completion of the conversation, unavoidable delay results while the Operator obtains the rate and computes the charge.

SUPERVISION BY PRIVATE BRANCH EXCHANGE OPERATORS.—The Long Distance Operator is held responsible for the supervision and timing of all messages and for the character of the service furnished. Supervision of connections by Private Branch Exchange Operators interfere with satisfactory service, and such Operators should not remain "cut in" on the line after the connection has been established.

Report all complaints of Long Distance Service to the "Long Distance **Chief** Operator"

For information not given above, concerning Long Distance service, call "Long Distance **Information** Operator"
